Customer Journey Map

Date	15 March 2026
Team ID	0827CY231062
Project Name	Health360: Executive Analytics & Population Health Dashboard
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage.

Phase of Journey	Stage 1: Data Access & Initial Cohort Overview	Stage 2: Deep-Dive Risk & Behavioral Analysis	Stage 3: Dynamic Subgroup Drill-Down & Strategy
Actions (What does the customer do?)	Loads the Health360 Master Dashboard on Tableau Public and reviews top-level executive metrics (Total Patients, Baseline Risk Score, Disease Prevalence).	Navigates across scatter plots, lifestyle heatmaps, and exercise/BMI bar charts to evaluate clinical and behavioral risk patterns.	Clicks on specific chart elements (e.g., "Senior" age bracket or "Obese" BMI slice) to trigger cross-filtering across all 9 dashboard worksheets.
Touchpoint (What part of the service do they interact with?)	KPI Cards & Chronic Disease Prevalence worksheets on the main dashboard canvas.	Vitals Risk Correlation (BP vs. Cholesterol), Lifestyle Heatmap, and Exercise vs BMI charts.	Interactive Global Filter Actions (Age & Gender Distribution, BMI Distribution, Lifestyle Heatmap) & Tableau Story points.
Customer Thought (What is the customer thinking?)	"Does this platform immediately show me our 5,000-patient cohort health baseline without loading delays?"	"How strongly do smoking, inactivity, and high blood pressure correlate to elevate composite risk scores?"	"Can I isolate senior or obese patient subgroups in real-time to allocate targeted wellness resources?"

Customer Feeling (What is the customer feeling?)	Informed and curious about underlying cohort risk distribution.	Focused, analytical, and engaged with multi-variable risk matrices.	Empowered, confident, and decisive with 1-click subgroup filtering.
Process Ownership (Who is in the lead on this?)	Solo Data Analyst / Lead Visualizer (You)	Solo Data Analyst / Lead Visualizer (You)	Solo Data Analyst / Lead Visualizer (You)
Opportunities (How can we improve this stage?)	Embed automated summary callouts directly on KPI cards to highlight baseline anomalies instantly.	Integrate reference line tooltips explaining clinical thresholds for blood pressure and cholesterol.	Add reset-filter buttons and mobile-responsive container layouts to streamline handheld executive navigation.
