Project Development Phase

Performance Test

Date	10 February 2026
Team ID	
Project Name	Health360: Executive Analytics & Population Health Dashboard
Maximum Marks	

Project Performance Testing:

Project team shall fill the following information in model performance testing template.

S. No.	Parameter	Screenshot / Values
1.	Data Rendered	**5,000 Patient Records** ingested from smart_healthcare_dataset.csv • *Initial Dashboard Render Time:* **< 1.8 seconds** • *Tableau Data Extract (.hyper) Query Latency:* **< 120 ms**
2.	Data Preprocessing	• **Extract Optimization:** Converted raw CSV data into an in-memory columnar Tableau Data Extract (.hyper). • **Schema Validation:** Null values handled, numerical ranges validated (BP, Cholesterol, BMI), and string data standardized.
3.	Utilization of Filters	• **Global Action Filters:** Instant cross-filtering applied seamlessly across all 9 connected dashboard worksheets. • **Filter Interactivity Latency: < 0.5 seconds** per click action (e.g., clicking *Obese* pie segment dynamically filters all vitals, symptoms, and lifestyle charts instantly).

4.	Calculation fields Used	• **Age Category:** Chronological IF-THEN branching (Children, Young Adult, Adult, Middle Age, Senior, Elder). • **Calculated Risk Score:** Multi-factor weighted composite scoring algorithm combining vitals and behavioural inputs. • **Chronic Condition Rate & Sedentary Rate:** Binary indicator aggregations for fast executive KPI rendering.
5.	Dashboard design	**No. of Visualizations / Graphs: 9 Worksheets + 1 Integrated Master Dashboard** 1. *KPI Cards (Scorecards)* 2. *Blood Pressure vs. Cholesterol (Scatter Plot)* 3. *Disease Prevalence Overview (Grouped Bar Chart)* 4. *Smoking vs. Alcohol (Stacked Bar Chart)* 5. *Exercise vs. BMI (Multi-panel Bar Chart)* 6. *Lifestyle Heatmap (Matrix Heatmap Grid)* 7. *Age & Gender Distribution (Diverging Bar Chart)* 8. *BMI Distribution (Pie Chart)* 9. *Symptom Analysis (Multi-metric Bar Chart)* 10. *Health360 Master Dashboard (Single-Screen Integrated Canvas)*
6	Story Design	**No. of Visualizations / Graphs: 9 Story Points** • *Sequenced narrative stepping through executive KPIs, clinical vitals correlations, behavioural co-occurrence, demographic life stages, and symptom breakdown.*
