Project Demo Planning

Date	15 March 2026
Team ID	0827CY231062
Project Name	Health360: Executive Analytics & Population Health Dashboard
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S. No.	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Project Context	Introduce Health360, outline the 5,000-patient synthetic cohort, and articulate the executive problem statement regarding fragmented clinical/lifestyle data.	2 Mins	Solo Contributor
2	Executive Personas & Architecture	Introduce the target executive personas (Dr. Carter, Emily Rodriguez, Dr. Priya Nair) and briefly explain the CSV-to-Tableau .hyper extract architecture.	2 Mins	Solo Contributor
3	Health360 Master Dashboard Walkthrough	Demonstrate the single-screen Master Dashboard, highlighting top KPI BANs and performing live interactive global cross-filtering across all 9 connected worksheets.	5 Mins	Solo Contributor
4	9-Point Executive Tableau Story Narrative	Step through the guided 9-point Tableau Story on Tableau Public, illustrating clinical vitals correlations, behavioral risk heatmaps, demographics, and symptom prevalence.	4 Mins	Solo Contributor
5	Performance Testing & Key Takeaways	Present sub-second render speeds, extract performance highlights, business advantages, and summarize clinical impact for health leadership.	2 Mins	Solo Contributor
6	Q&A & Stakeholder Feedback	Address evaluator questions, demonstrate specific cohort slice requests live on Tableau Public, and wrap up presentation.	5 Mins	Solo Contributor

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Open with slides/overview establishing the core pain point: static EHR spreadsheets concealing vital correlations between clinical metrics and lifestyle risks.
2	Solution Overview	Explain how Health360 transforms raw tabular rows into pre-calculated metrics (Age Category, Calculated Risk Score) and single-screen interactive visual analytics.
3	Live Feature Demonstration	Conduct live web walkthrough on Tableau Public: click *Obese* pie segment / *Senior* age group to showcase real-time global cross-filtering across vitals, habits, and symptoms.
4	Q&A Session	Field evaluator questions, perform custom on-demand filter queries, and discuss future scope (live database feeds and machine learning risk modeling).
